

Be a SMART Charger

Thanks for taking part in our fire safety session. You have learnt...

The potential **fire risks** caused by electricity

To share **safer behaviours** around electricity

The importance of **electrical safety**, especially when using and **charging devices**

REMEMBER

Be **safe** by checking your charging cables are not broken or frayed before using them

Be **mindful** by checking your plug sockets are not overloaded

Be **awake** and charge your devices during the day

Be **responsible** by charging your devices on a hard surface

Be **there** and make sure you don't leave charging devices unattended

LET'S TALK

ASK YOUR ADULTS

Will you check your charging cables before using them?

Will you keep charging your device on a hard surface?

Will you be mindful of where you plug your devices in?

Will you always be aware of where your device is charging?

Will you charge your device whilst you are awake?
